Gentlemen:

IN REPLYING REFER TO

#94

ALL STATEMENTS OR AGREEMENTS CONTAINED IN THIS LETTER ARE CONTINGENT ON STRIKES, ACCIDENTS, FIRES OR ANY OTHER CAUSES BEYOND OUR CONTROL AND ALL CONTRACTS ARE SUBJECT TO APPROVAL BY THE SIGNATURE OF A DULY AUTHORIZED EXECUTIVE OFFICER OF THIS COMPANY. CLERICAL ERRORS SUBJECT TO CORRECTION

Subject: Request for return of Copyright deposits.

The undersigned claimant of copyright in the work herein named, deposited in the Copyright Office and duly registered for copyright protection, requests the return to him under the provisions of sections 59 and 60 of the Act of March 4, 1909, of both of the deposited copies of the motion picture film entitled:

THE FORDSON - MANUFACTURING

deposited in the Copyright Office on October 13th, 1925, and registered under class _____, XXc., No. _____. ©CIM 3196

If this request can be granted the claimant will call for the said copies upon notification by your office.

THE FORDSON.

OCT 13 1925

Produced and Distributed by Ford Motion Picture Laboratories.

Copyright 1925, Ford Motor Company.

- Title #1. Manufacturing.
- Title #2. Methods of transportation and the application of power used by other concerns in the same line of business as your own, are always of interest, especially when these methods effect a real saving.
- Title #3. There is little doubt but that the power that serves the other concern faithfully, materially reducing costs of handling stocks, material, apparatus or equipment, will accomplish the same results for those who have similar working conditions, but are not using the same method.
- Title #4. Whitehead & Kales Company, Detroit, use 12 Fordsons for interplant hauling, replacing wheelbarrows, men, teams and electric trucks, at a saving of \$ 100 per day.
- Title #5. Foundries haul slag out of narrow quarters with Fordsons. The investment is about one-third that of electric tractors that will do the same work, and operating cost of Fordsons is considerably less.
- Title #6. Note the all-steel tractor operates safely around fires.
- Title #7. Sweeping factories, walks, yards, and streets with Fordsons saves hundreds of men.
- Title #8. An electric welder that goes to the job, often saving thousands of dollars on a job.
- Title #9. Three tractors handle 27 five-ton trailers, 12 loading, 12 unloading and three intransit. To handle this job with five-ton trucks would require an investment of \$135,000. This equipment cost \$26,100.
- Title #10. Four-wheel trailers are backed into difficult positions by Fordson tractors. Ordinary flexible hitch is used.
- Title #11. To haul this load would require \$10,000 investment in heavy trucks, whereas this unit cost \$2,500. The saving on depreciation and operation is in same proportion.
- Title #12. Portable crane displaces 6 to 8 men in loading heavy equipment. The same tractor then transports the load to its destination.
- Title #13. Production is often delayed because the switch engine is not on hand when a car is loaded. A small investment in a Fordson may save thousands of dollars annually.
- Title #14. Backing trailers is a specialty for the Fordson. Briggs Mfg. Company, Detroit, use 14 Fordsons with a saving of \$49,000 in investment, to say nothing of the saving in depreciation and operation.

Title #15. Many successful applications of Fordson Power through the use of special devices for hauling, lifting, moving, etc., have succeeded in materially reducing expenses for other firms.

Title #16. Any Ford dealer will be glad to supply you with the special Fordson Analysis Form, and the Ford Motor Company will at any time arrange a demonstration for you of a suitable application of Fordson Power in your business.

Title #17.

THE END.
